REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The base claim is: claim 1.

The closest prior art found can be summarized as follows:

Bailey (US Patent No. 4,950,525) discloses a composite (*retroreflective sheeting, title*) on a surface of a substrate, wherein the composite consists essentially of a first coating comprising a pigment and binder polymer, reflective beads, and a clear coating comprising binder polymer (*col. 2, lines 5-26, col. 3, line 68 and col. 10, lines 20-23*), wherein the surface of the substrate is a road surface and the composite is a traffic marker (*col. 9, lines 30-33*).

The prior art fails to teach or suggest the recited composite where the first coating comprising pigment and binder polymer, when applied to the substrate, the first coating contains from 40% to 80% volume solids, where the clear coating comprising binder polymer when applied to the substrate contains from 10% to 50% volume solids and wherein the ratio of the diameter of the reflective bead to the wet film thickness of the first coating is between 2.0 and 10.0 and the ratio of the diameter of the reflective bead to the dry film thickness of the clear coating is between 0.5 and 3.0.

In sum, the prior art of record fails to teach or suggest composite on a surface of a substrate having all the features of the base claim.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
